## BOLLA R SFIORO 200x150 <br> With automatic water recirculation system

The bath must be installed by a qualified electrician and plumber.

Before connecting the bath, the installe $r$ must see that the electrical system is protected by a circuit breaker (0.03) and that the earthing system complies with the laws in force in the country of installation.

The whirlpool bath must be connected to the electrical system permanently (with an H 05 cable $-3 \times 2.5 \mathrm{~mm}^{2}$ threepole with a $2.5 \mathrm{~mm}^{2}$ cross section) by means of a double-pole switch (minimum 3 mm opening between contacts) and suitably rated (KW) for the appliance to be connected, located away from areas $0,1,2,3$ and from areas where jets of water are possible.

| SYSTEMS | Electrical specification |  |  |  | Jet |  | Water cont |  | Siz |  |  | Packing | dimension |  | Weight |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Volt | A | KW | Hz | Whirl | Air | Use | max | lenght | width. | height | lenght. | width. | height | net | gross |
| Airpool | 230 | 20 | 4.3 | 50 | -- | 24 | 420 | 620 | 200 | 150 | 64 | 200 | 200 | 85 | 105 | 149 |

Provide for the inspection panel and snorkel.

The data are to be considered without accessories.

The overall dimensionsare given in centimetres.Actual dimensions canvary by $\pm 1 \mathrm{~cm}$.

The bath must also be connected to the building's equipotential earthing syste $m$ by means of a terminal on the frame. If the bath is to be recessed in walls, the guarantee will only be valid if the walls are fittedwithinspection and aeration grids of a suitable size.
It is also important that the bath can be taken out at any time without having to do anything to the walls.

WARNIN G: if all or even part of the above described conditions are not complied with the safety of the whirlpool bath cannot be guaranteed and, as such, not only is the guarantee invalidated butalso the manufacturer can in no way be held liable for any direct or indirect damages caused by the bath.
In those cases where such conditions are not complied with, the guarantee will only cover the substitution of parts deemed defective and not the labou needed if the bath has to be removed.

If the bath is recessed the masonry cannot reenter more than 1 cm with respect to the external edge of the bath. An inspection panel and air intake must be installed.

Provide shut-off cocks out of the dimensions of the product for hot and cold water closing.

LEGEND:
A - A1 - Mixed water outlet (connects to 'attack F).

B-B1 - Power outlet H05 3x2,5mm (minimum. length. 3 [m]).
C-C1 - Equipotential cable.
S-S1 - Flush-to-floor drain $\varnothing 50$ or wall drain $\varnothing 50$.
S2 - Safety secondary drain.*

PREPARE FOR TUB BUILT-IN.

CONDITIONS FOR PANNELED TUB.

If the water pressure is higher than indicated, install pressure reducers.

NOTES
Position of the outlets in the wall of the pit, haven't to be over the frame height up to 15 cm .
